

What if **smarter transport** connections meant **better mobility** for **everyone?**

Roads, railways, waterways, cars, trains and ships are often managed separately, creating inefficiencies and limiting progress.

- 

MOVEO is building an intelligent framework to connect vehicles and infrastructure across all modes of transport.

The intelligent framework is powered by AI, digital twins, and data integration to make transport safer, sustainable, and inclusive.

MOVEO has an External Advisory Board where stakeholders are welcome to give their feedback on the applicability and market impact of MOVEO results. Don't hesitate to get in touch with us.
